

Gates OE quality fuel caps

For passenger cars, trucks and buses

Perfect sealing

Gates fuel caps offer a durable construction of a wear-resistant thermoplastic compound to ensure tight closing and to avoid spills and leaks. Gates' standard fuel cap range includes **locking and non-locking caps**. The locking fuel caps fix securely and make tampering with your fuel tank impossible. All fuel caps are easy to install.

Optimum fuel pressure

The caps can have two different breathing systems: **vented or non-vented**. A non-vented fuel cap is recommended when your fuel tank is ventilated through the filler neck, whereas the vented fuel cap is equipped with a special breathing valve so that it can be used on non-ventilated fuel tanks.

A cleaner environment

In order to reduce air pollution as much as possible Gates supplies a **special ecological cap**. It is fitted with a venting valve system which prevents evaporation of harmful car fuel gases and complies with the EEC directive No. 70/221. In case of an accident the safety valve prevents fuel leaking from the tank.

Additionally, Gates offers a range of locking caps resistant against urea corrosion, covering all main AdBlue tank applications.

The Gates fuel system programme

Being a world-leading manufacturer and supplier of automotive products, Gates provides a complete line of belt drive system, cooling system, fuel system and air system products for passenger cars, light-duty commercial vehicles and trucks, buses and tractors.

Apart from fuel caps, the Gates product portfolio for fuel systems also contains:

- Several types of fuel hose
- Special submersible fuel line hose for in-tank applications
- Fuel hose connectors
- Appropriate merchandisers

Fuel cap merchandiser

This merchandiser has been designed to display a minimum of 36 fuel caps. These can be selected out of the Gates fuel cap range to suit local market requirements.

- 930 mm wide frame with Gates sign
- 18 hooks
- Can be mounted on a wall, pegboard or simply put on the counter

Please refer to the Gates price list for specifics, or consult your Gates representative for more information.

More information on sizes and applications can be found in the Gates Fuel Cap catalogue E/70328 or online at www.gatesautocat.com.
